CASINO HEIST

ALCATRAZ

CASINO HEIST

OVERVIEW

You are a member of America's most successful crime syndicate. Your specialty has always been lock picking. Today, you'll be facing your greatest challenge yet, as you and your team attempt a heist at the Valley Isle Casino.

Your recon team has just completed phase one of the heist – they have temporarily neutralized the security cameras and gained access to the casino owner's office, where the door to the vault awaits. They have assessed the situation and have reported that this particular vault is going to be difficult to compromise. They have discreetly hidden clues, tools and hints around the office which you will need to complete your job as safecracker.

The security system has been deactivated for 45 minutes. After that amount of time, the alarm will sound, and you will have 5 minutes from that point to escape before law enforcement arrives.

If you are going to the dinner meeting on November 16th, please bring your payment there.
